

CYBER INSURANCE CAPACITY BUILDING & IMMERSION SUMMIT GHANA

2-DAY INTENSIVE PROGRAMME

THE OPPORTUNITY YOU CANNOT AFFORD TO MISS

Africa stands at an inflection point. While 50% of US organisations carry cyber insurance, Africa sits at under 1%. Ghana, the region's largest insurance premium market at \$320M, represents both the highest concentration of insurable cyber risk and the greatest readiness for adoption.

This is not a conference. This is a transformation engine. Participants leave with deep knowledge, Africa-specific frameworks, and a signed 90-day action plan ready for board presentation.

\$3.5B

Annual African
Cyber Losses

\$28B

Global Cyber
Insurance Market

<1%

African Cyber
Insurance Penetration

WHO SHOULD ATTEND

Designed for senior-level professionals across the full insurance and risk value chain. A minimum of 2–3 participants per organisation is recommended.

INSURANCE COMPANIES

Underwriters & Actuaries
Claims Managers
Risk Officers
Product Development Teams
CEOs / MDs & Board Directors

REINSURERS & BROKERS

Reinsurance Underwriters
Treaty Structurers
Brokers (Retail & Wholesale)
Loss Adjusters
Technical Officers

REGULATORS & OTHERS

NIC / Regulatory Officials
CISOs & IT Directors
Fintech & Insurtech Leaders
Banks & Telcos Risk Teams
Academic & Research
Institutions

12 MODULES

2 DAYS TOTAL IMMERSION

Three acts. One transformative experience. Every session builds toward a shared understanding of cyber insurance — and each participant's 90-day board-ready roadmap.

ACT 1 — THE CYBER REALITY

Before any insurance, every participant — CEO, actuary, broker, or regulator — understands the threat.

M1 The Global Cyber Threat Landscape Ransomware · BEC · Nation-state actors · DDoS · The anatomy of a cyber event	M2 Africa & Ghana — Real Incidents, Real Losses Africa's \$3.5B cyber economy · Ghana-specific cases · Mobile money fraud · The insured vs uninsured gap	M3 How Organisations Are Responding — and Failing The governance gap · Why cybersecurity controls alone are not enough · The case for risk transfer
---	--	---

ACT 2 — THE INSURANCE RESPONSE

From threat awareness to technical mastery — underwriting, pricing, claims, reinsurance, and regulation.

M4 Cyber Insurance Foundations What it is, what it isn't · First & third-party · Policy architecture · Coverage triggers · Exclusions	M5 Underwriting & Risk Assessment in Practice Risk scoring · Application design · Sector profiles · Accumulation management	M6 Pricing, Actuarial Science & Data Scarcity Frequency-severity modelling · Catastrophe accumulation · Pricing in data-limited African markets
---	---	---

12 MODULES

2 DAYS TOTAL IMMERSION

M7 CIDA™ — AI and the African Pricing Problem What CIDA™ is · How AI/ML scores cyber risk · The bridge between risk assessment and underwriting confidence	M8 Cyber Claims — Incident Response to Settlement Claims lifecycle · BI quantification · Ransomware · Real African case studies	M9 Reinsurance & Treaty Structures for Cyber Proportional vs non-proportional · Cat XL · African reinsurer capacity
M10 Regulation, Compliance & NIC Ghana NIC Ghana framework · Data Protection Act · GDPR implications · Board governance	M11 Product Design for African Markets SME cyber · Parametric triggers · Policy wording · Micro-cyber insurance · Distribution	M12 Building the Ecosystem & Your 90-Day Action Plan WAICA · Public-private models · 2025–2030 roadmap · Board-ready readiness plan

WHAT YOU WILL LEAVE WITH

Full Cyber Insurance Mastery: End-to-end command of underwriting, pricing, claims, reinsurance, compliance and product design, from foundational to boardroom-ready.	90-Day Action Roadmap A board-ready, organisation-specific cyber insurance readiness plan built during the summit, your actual plan, not a template.
Africa's Cyber Insurance Report Complimentary copy of the AAJIMATICS African Cyber Insurance Market Report, the only Africa-focused intelligence resource on the continent.	Certificate of Completion: CPD-recognized certification from AAJIMATICS Technologies, qualifying for NIC Ghana and regional professional development hours.
AAJIMATICS Partnership: Direct access to AAJIMATICS partnership pathways, technology licensing, co-product development, or regional distribution rights.	

ABOUT AAJIMATICS

AAJIMATICS is a technology and data intelligence firm headquartered at McMaster Innovation Park, Hamilton, Ontario, Canada, with active operations across West Africa, Nigeria, and select Caribbean markets.

The firm specialises in AI/ML solutions, eSecurity, and cyber insurance innovation, bringing engineering rigour and deep African market knowledge to one of the continent's most underserved risk categories.

In Africa, AAJIMATICS has delivered critical national-level technology projects including Nigeria's eHealth Strategic Framework, National Open Data Guidelines, and National Cyber Security Risk Assessment. Its proprietary algorithm, CIDA™, has established itself as the reference standard for cyber risk scoring for insurance purposes in Nigeria and across select African and Caribbean markets.

AAJIMATICS's work in cyber insurance is not theoretical. It is built on years of on-the-ground engagement with African institutions, regulators, insurers, and technology ecosystems, making it the knowledge partner of choice for West Africa's cyber insurance revolution.

CIDA™
@ AAJIMATICS

CYBER INTELLIGENCE DECISION ALGORITHM

CIDA™ is a proprietary AI/ML algorithm that calculates the security level of an organisation's cyber assets, identifies risk exposures, and generates a cyber risk score that speaks directly to the likelihood of a security incident. That score becomes the foundation insurers and underwriters use to determine the right premiums and policies, with confidence, backed by real data. For African insurers operating in a market where credible cyber risk data has historically been scarce, CIDA™ changes the equation entirely. It is not a demo. It is not a platform for public access. It is AAJIMATICS's proprietary intellectual engine, and the reason African cyber insurance can finally be underwritten with precision.

FACULTY

Speaker

KHALID MOMODU

Chief Executive · YOA Risk Services Limited

SPEAKER PROFILE

Khalid is a seasoned insurance and reinsurance executive with more than two decades of leadership across Africa and the Gulf region. He brings deep technical expertise and compelling real-world insight drawn from senior roles at Swiss Re, YOA Insurance Brokers, and several prominent African insurance companies.

As Chief Executive of YOA Risk Services Limited — a DFSA-licensed entity in the Dubai International Financial Centre — Khalid leads the origination and structuring of (re)insurance solutions for sub-Saharan African markets. His direct experience spans Energy, Marine, Cyber, Trade Credit, and Reinsurance, making him a uniquely versatile voice on (Re)insurance practice in emerging and frontier markets.

Khalid is known for his ability to translate complex technical concepts into actionable insight for practitioners, underwriters, brokers, and risk managers alike. He draws perspective from live market experience, cross-jurisdictional client relationships, and first-hand knowledge of the regulatory and commercial landscapes across West Africa, the UAE, and international reinsurance markets.

Ebo Richardson

Principal Consultant

A seasoned and experienced Senior Leader with a strong blend of cross-functional, multidisciplinary, and international know-how comprising Change Management, Digital Transformation, Technology Operations, Enterprise Architecture, Information Security, Operational Risk, and Audit. .

*More than 25 years of work experience and a proven delivery track-record in 6 Markets across 3 Continents.

- Worked with the likes of PricewaterhouseCoopers, KPMG, Barclays, Vodafone, Santander etc
- Top-tier proponent of Digital / Organizational Transformation.
- Highly skilled / experienced in IT and Cybersecurity.
- Led a number of large-scale Business Transformations (including Barclays to Absa).
- Managed BUs of upwards of 300-strong workforces, and budgets in excess of \$40m.
- Held three high-profile CIO roles and was Chief Architect at Absa Africa.
- Holder of multiple Board roles (primarily as an Independent Non-executive Director).
- Celebrated Lecturer, Trainer, and Coach

Cyber, Cloud & AI Strategist

cfso2@aajimatics.ca is a Technology Strategist, AI Transformation Leader, and Enterprise Innovation Architect whose work sits at the intersection of artificial intelligence, cybersecurity, cloud infrastructure, fintech evolution, and anticipatory intelligence. With a multidisciplinary background spanning technology, strategy, governance, behavioural intelligence, and systems thinking, cfso2 helps institutions transition from analog fragility to digital resilience. His expertise cuts across AI strategy, cloud computing, cybersecurity governance, enterprise architecture, fintech ecosystems, automation systems, and large-scale digital transformation.

As Chief Futurism & Strategy Officer, cfso2 leads Aajimatics' strategic foresight agenda, operationalising anticipatory intelligence for governments, financial institutions, startups, and enterprise leaders across Africa and beyond. He is widely recognized for translating complex technological disruption into actionable frameworks - his work does not merely interpret change, it operationalizes it. He is also the architect of forward-looking models that integrate artificial intelligence with human potential development, pioneering frameworks that merge predictive systems, behavioural intelligence, and life design architecture.

Beyond strategy, cfso2 is a systems builder. He designs AI-powered frameworks that automate opportunity discovery, optimise career pathways, and enhance enterprise performance. His work blends technical depth with strategic foresight - ensuring innovation is not only visionary, but executable. A compelling speaker and systems-level thinker, he continues to champion a defining thesis: "AI is not the future of work. It is the present. Nations that delay adoption are not standing still - they are declining in real time."

Principal-Cyber @ Aajimatics

Principal-Cyber@aajimatics is first a cybersecurity multipotentialite, a technology advisor, architect, and builder. As Principal Consultant, he helps organizations make smarter, more resilient technology decisions at the speed business demands.

Over more than a decade, he has worked at the intersection of technology strategy, digital transformation, AI orchestration, cybersecurity, and regulatory compliance. His client footprint spans fintech, insurance, pension, retail, healthcare, e-commerce, edtech, and MDAs, with engagements across Nigeria, South Africa, the United States, the United Kingdom, and Canada. He does not just advise; he builds. From AI-

orchestrated security platforms to enterprise compliance frameworks, his work leaves infrastructure behind.

Recognized among 2025's "Trailblazing Cybersecurity Leaders to Watch" by CIO Look Magazine and featured in The Nation newspaper, he occupies a rare position: a practitioner fluent in both board-level strategy and deep technical execution. He holds professional certifications from Amazon, Microsoft, ISACA, GitHub, and EC-Council, and is advancing a Doctorate in Business Administration specializing in Data and Cybersecurity.

A compelling voice on the global speaking circuit, with appearances at Africa CyberFest, SecjuiceCON, Open Source Africa, Google DevFest, and beyond. He operates at the rare intersection of hands-on technical mastery and executive-level strategic influence. He is an ex-Fellow of the Pan-African Youth Ambassadors for Internet Governance (PAYAIG) and a certified Ambassador of the Management & Strategy Institute (Pennsylvania, USA).

His conviction is simple: technology built for African businesses must be designed with African realities in mind. That belief drives everything he builds, advises, and advocates for.

Adekunle Ajiboye

Adekunle Ajiboye is a Software Architect and Data Strategist whose educational and professional background gives him a broad range of domain expertise in digital transformation and disruptive technologies. Adekunle's recognized expertise spans the intersection of cloud computing, big data, cyber security, IoT, AI and Entrepreneurial Consulting. Aside from his leadership roles @ AAJIMATICS, Cyber Hive and other firms, he sits on the board of several private companies and serves as a SME @ the GEIA among other institutions.

In celebration of Canada's sesquicentennial in 2017, he was honored with the Nation Builder Award on behalf of the Parliament of Canada by David Sweet who was the Conservative Member of Parliament for Flamborough-Glanbrook and past Chair of the Conservative caucus.

He is a celebrated alumnus of McMaster University Hamilton, Ontario Canada with graduate degrees in Engineering and eHealth and also recognized as one of McMaster University's 150 outstanding Engineering graduates.

He is a HIMSS-EP and member of IsFTEH, COACH and AMIA and also featured in Canada's Who's Who. Adekunle continues to be heavily involved on the Entrepreneurship landscape in North America and Nigeria with experiential success

and was nominated consecutively for the Niagara Entrepreneur of the Year Award in 2016 and 2017. Adekunle is an advisor to governments and institutions and also makes time to serve as an adjunct professor at 2 of North America's leading universities as part of his commitment to impacting the next generation. Adekunle developed and delivered the eHealth Innovations & Trends and Artificial Intelligence courses for the MBA-MPH program at Brock University between 2020 and 2024. Adekunle is a member of the School of Computing External Program Advisory Committee (EPAC) @ the University of the Fraser Valley (UFV) where he also develops & delivers the Micro Credentials in HealthTech and Cyber Security.

He is also a frequent speaker on eTechnologies to academic and international conference audiences.
